DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 29, 2003 has been entered.

Response to Amendment

The Amendment, filed on July 29, 2003, has been entered and acknowledged by the Examiner.

Cancellation of claims 37-48 and 57-60 has been entered.

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:

Claim 49 recites the limitation "said d-element is at least one element selected from the group consisting of ... and Al", the Examiner notes that while Al is present in the claims as originally filed, it is not recited in the Markush group disclosed in the specification, Page 5, last paragraph. Accordingly, the specification fails to provide proper antecedent basis for the claimed subject matter.

Application/Control Number: 09/470,057

Art Unit: 2879

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 71 is rejected under 35 U.S.C. 102(b) as being anticipated by Onikubo et al. (JP 09-097676).

Regarding claim 71, Onikubo discloses an organic EL device having a luminescent material containing layer interposed between a positive electrode and a negative electrode for supplying electrical energy to the luminescent material for emitting light upon receipt of the electrical energy, the negative electrode containing f-, p-, and d-element wherein the f-element is at least one element selected from the group consisting of La, Ce, Nd, Sm, Gd and Er (Column 3, paragraph [0009]), the p-element is at least one element selected from the group consisting of Ga, In and Zn (Column 3, paragraph [0011]), and the d-element is at least one element selected from the group consisting of Co, Ni, Pd, Pt, Cu, Au and Sb (Column 3, paragraph [0010]).

Allowable Subject Matter

Claims 49-56 and 61-70 are allowed over the prior art of record.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 49, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 19, and specifically comprising the limitation of the negative electrode containing f-, p- and d-elements wherein the f-element is at least one

Application/Control Number: 09/470,057

Art Unit: 2879

element selected from the group consisting of Be, Ti, V, Cr, Mn, Zr, Nb, La, Ce, Pr, Nd, Sm, Gd, Tb, Dy, Ho, Er, Tm, Lu, Hf and Ta, the p-element is Sb and the d-element is at least one element selected from the group of Re, Fe, Ru, Os, Co, Rh, Ir, Ni, Pd, Pt, Cu, Au, Hg, Tl, Si, Ge, P, As, Sb, Se and Te and wherein the d-element is excluded from the selection of the f- or p-element.

Regarding claims 50-56 and 61-63, claims 50-56 and 61-63 are allowable for the reasons given in claim 49 because of their dependency status from claim 49.

Regarding claim 64, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 64, and specifically comprising the limitation of the negative electrode comprises a first layer closest to the luminescent material-containing layer and a second layer overlying the first layer and a third layer overlying the second layer, and wherein the first layer is made from at least one of the f-element, the layer is made of a mixture or compound of the f- and p-elements and the third layer is made of at least one of the p-element.

Regarding claims 65-67, claims 65-67 are allowable for the reasons given in claim 64 because of their dependency status from claim 64.

Regarding claim 68, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 68, and specifically comprising the limitation of the negative electrode comprises a first layer closest to the luminescent material-containing layer and a second layer overlying the first layer and a third layer overlying the second layer, and wherein the first layer is made from at least one of the f-element, the layer is made of a mixture or compound of the f- and p-elements and the third layer is made of at least one of the p-element.

Art Unit: 2879

Regarding claims 69-70, claims 69-70 are allowable for the reasons given in claim 68 because of their dependency status from claim 68.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mariceli Santiago whose telephone number is (703) 305-1083. The examiner can normally be reached on Monday-Friday from 7:00 AM to 3:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nimesh Patel, can be reached on (703) 305-4794. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-7382. Additionally, the following fax phone numbers can be used during the prosecution of this application (703) 872-9318 (for response before a Final Action) and (703) 872-9319 (for response after a Final Action).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
